TODAY'S INNOVATORS IN THE PUSH TOWARDS CLEAN TRANSPORTATION

As hubs for innovation and progressive thinking, universities have a certain responsibility to champion environmental values. Universities are uniquely positioned to tap into the rising wave of clean transportation while providing a valuable amenity and improving campus sustainability.

Maintaining a cutting-edge, ultra-sustainable learning environment is fast becoming an effective way to attract the greatest minds and talent to a university. Reinforce your university's commitment to the environment and a sustainable lifestyle by having sleekly-designed EV charging stations available across your campus. The average stay while visiting a university is the perfect length for recharging.

- The Station has been designed to be visually compelling to effectively enhance the image of its host property location.
- Installation is simple, quick and affordable. The electrical service connection only requires 3 wire nuts, 4 screws and you're done!
- Be a leader in this highly visible sustainable industry.
- Provide a valuable amenity to students, faculty, staff, guests, and visitors.
- Every time a student, faculty member, employee or visitor enters or leaves your campus, they will be reminded of your commitment to sustainability.
- The Station system includes environmental reports for carbon offset and oil reduction.
